## DE-STA-CO offers one-stop process for automation needs

Auburn Hills, Mich.—DE-STA-CO, the worldwide leader in industrial automation components, announces Modular Solutions, the latest addition to its offering of productivity services.

Modular Solutions offers customers a streamlined, one-stop process for design, manufacturing, assembly and service of their factory automation needs.

Because of the complex nature of production systems, customers sometimes rely on outside integrators to develop them. Oftentimes, those integrators choose components from a variety of companies and encounter difficulties maximizing production efficiencies. That can lead to unnecessary complexity, longer lead times and added pass-through costs.

With Modular Solutions, customers can save time and effort by working directly with DE-STA-CO's design experts to craft solutions that use quality DE-STA-CO components, which are already designed, engineered and manufactured to work in harmony.

With offices and channel partners in 11 countries, DE-STA-CO's broad distribution network provides global support to customers in a variety of industries, including:

- § Automotive
- § Aerospace
- § Food
- § Pharmaceutical/Medical
- § Packaging
- § Nuclear/Bio-hazard

### About DE-STA-CO

DE-STA-CO, a Dover Company, is a worldwide leader in the innovation, design, manufacture and support of clamping, gripping, indexing, transfer and robotic tooling solutions for workplace and automation needs.

The company has two major business units: Automation and Workholding, and has operations in all major continents.

The company is committed to the Team DE-STA-CO philosophy, a progressive approach to doing business that focuses on providing consistent, standard-setting service and products to every customer, regardless of geographic location.
