Robohand® makes the move for better customer solutions.

Auburn Hills, Michigan, May 1, 2009: DE-STA-CO announces the operations for the Robohand product line will move from Monroe, CT to Michigan. Throughout this transition, DE-STA-CO's two main priorities will be with it's customers and team members. Engineering and Technical Support will be located at our corporate headquarters in Auburn Hills, while Manufacturing, Assembly, Purchasing and Materials will be located in Charlevoix. DE-STA-CO will continue to provide the full complement of Robohand products during the transition and going forward.

"This move is being made to build a larger and broader base for our business to enhance our ability to serve our customers and leverage the synergies across our product lines", commented Pat Carroll, President of DE-STA-CO. *"We are excited about the improved ability we will have to drive new and innovative product platforms by leveraging the knowledge and experience of our design teams working closely together."*

Over the next several weeks DE-STA-CO will be working with their team members in Monroe and in Charlevoix to provide a seamless transition, which is transparent to customers.

About DE-STA-CO:

DE-STA-CO, a Dover Company, is a worldwide leader in the innovation, design, manufacture and support of clamping, gripping, indexing, transfer and robotic tooling solutions for workplace and automation needs. The company has two major business units: Automation and Workholding, and has operations in all major continents. The company is committed to the Team DE-STA-CO philosophy, a progressive approach to doing business that focuses on providing consistent, standard-setting service and products to every customer, regardless of geographic location.
