

# DESTACO SiMPLÉ

## Press Shop Simulation Made Simple

DESTACO's new SiMPLÉ Simulation software app was developed to work seamlessly with systems running CATIA. The new software will help customers quickly identify and resolve bottlenecks in their triax press line to help accelerate their productivity.

Using this software makes it easier to generate your press template, insert dies, automation and add motion curves to create a dynamic model of your process. It is easy to see bottlenecks in your process at an early stage when you run SiMPLÉ simulation it automatically optimizes the SPM to ensure you achieve the maximum output and identifies crashes and potential issues which are generated on a corrective action report for you to follow up. All this is done at the design stage to avoid expensive changes at a later stage, we call this 'shifting left'.

### Product Highlights/Options

- DIY or ask DESTACO
- Smart models for DESTACO components
- Motion curves can easily be imported/recreated
- All motions are calculated relative to time, making process very accurate
- Corrective action report

### Features, Markets and Applications

 <p>SPEED</p>	<ul style="list-style-type: none"> <li>• Built-in templates reduce repetitive operations and simulation time</li> <li>• Achieve maximum SPM</li> <li>• Windows application requires limited PC resources and will not slow down your computer</li> </ul>	 <p>AUTOMOTIVE</p>	 <p>PRESS ROOM</p>
 <p>PRECISION</p>	<ul style="list-style-type: none"> <li>• Customize parameters to suit your standards</li> <li>• Simulation based on time offers a more accurate SPM taking into account all dynamic parts with motion (regenerative gas spring, rotation units, sliders, and electric or pneumatic idle stations)</li> </ul>		
 <p>LOW/NO MAINTENANCE</p>	<ul style="list-style-type: none"> <li>• Video tutorials available</li> <li>• Technical support</li> </ul>		

# DESTACO SiMPLE

Press Shop Simulation made Simple

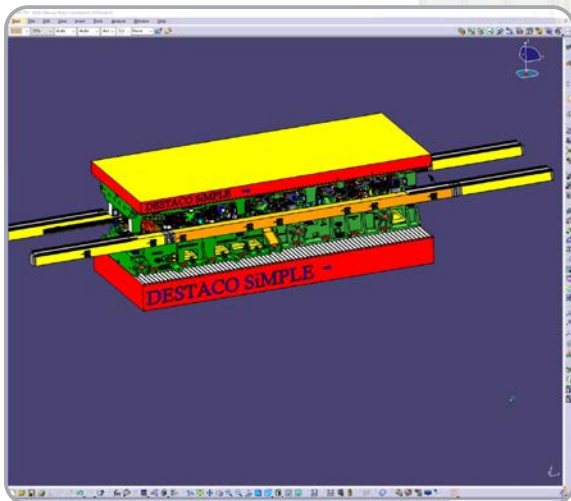

## SiMPLE - Easy Crash Report

- DESTACO SiMPLE is a dedicated press shop simulation package, built by our simulation team for ease of use and speed
- Many of today's press shops have a mixture of press types from old mechanical transfer presses to the latest servo cross bar presses, SiMPLE can deal with them all
- The press line template is built into the software and can be configured to suit your specification
- SiMPLE is very resilient and recovers to where the user left off with no loss of data
- All data for curves and calculations are made in SiMPLE decreasing simulation time compared to other software's that are using Catia

## SiMPLE - Intuitive

- Intuitive grab and slide press & automation curves
- Press and transfer curves can be inserted or generated starting from a graphic of the motion

# DESTACO SiMPLE

Press Shop Simulation made Simple

## SiMPLE - Easy to use

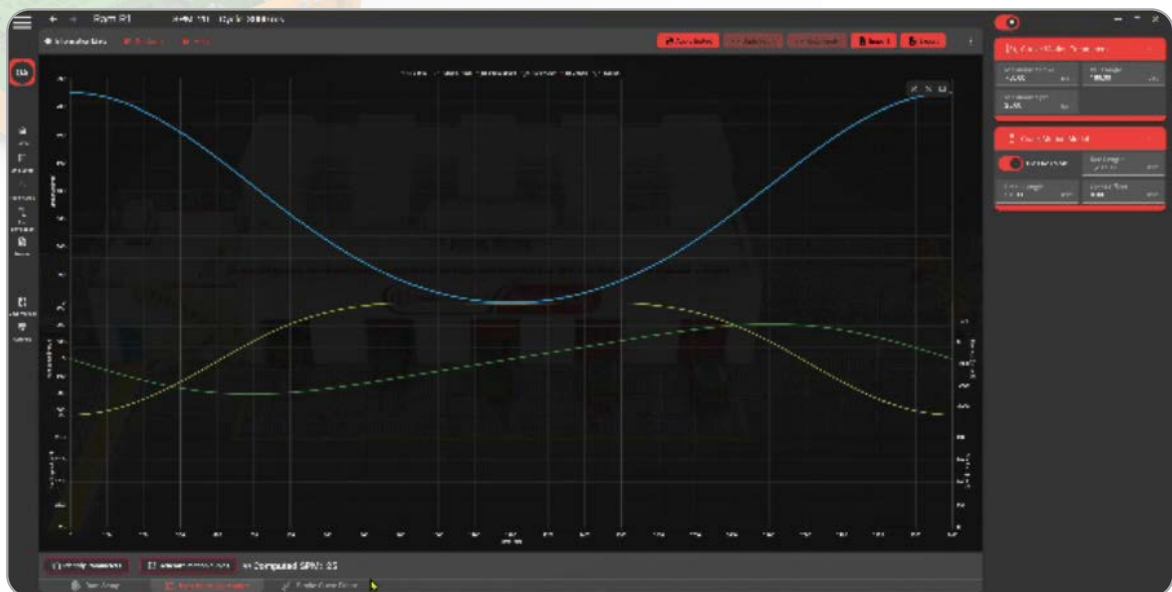

- DESTACO SiMPLE has an easy to use and intuitive synchronization tool for Press and automation
- SPM is calculated instantly during synchronisation

## SiMPLi - Easy Crash Report

- DESTACO SiMPLi crash report is easy to create in different formats: Excel, PDF or Power Point as well as a various range of video formats MP4, WVM and AVI – they can be in real time speed or in slow motion as desired
- Screenshots with easy highlighting options and comments can be create along a close up video

Dimensions and technical information are subject to change without notice.
