

Statement on Compliance with RoHS Directive 2011/65/EU, as well as in addition to including delegated Directive 2021/1980/EU

We hereby confirm that the products supplied by DESTACO Europe GmbH comply with the substance bans of the RoHS (2011/65/EU and including 2021/1980/EU) guideline.

Based on our experience from the commerce/flat-rate calculation with the RoHS and WEEE guidelines we refer to the VDMA position paper with which we are aligned. DESTACO products accordingly do not come under this law as intended, since they are mostly used on "LSSIT" = large-scale stationary industrial tools, "LSFI" = large scale fixed installations (see No. 6 attachment I, 2012/19/EU) or in other installations not subjected to WEEE. Should your use fall definitively under the RoHS guideline, please contact our quality management at +49 6171 705 116 for further instruction.

We hereby also confirm that the products supplied by DESTACO Europe GmbH are free of lacquer-wetting-disruptive substances (LABS) in accordance with DESTACO provision QMV-1041.

Best regards,

DESTACO Europe GmbH
